

HEAT-STYLING WITH A FLAT IRON

Blow-dry it. Curl it. Straighten it. OWN IT! EnvyHair's built-in moisture-control withstands temperatures UP TO **285°F (140°C)**—allowing you to make the style your own.

Secure your wig to a form with 2" T-pins, making sure **NOT TO PUNCTURE** any Lace or Monofilament material. When flat ironing EnvyHair™, make sure that your iron is set **NO HIGHER THAN 285°F (140°C)**.

Spray fibers first with a **HEAT PROTECTANT** then run flat iron over the section you want to smooth.

Use enough pressure to achieve desired smoothness in **ONE OR TWO PASSES**. Make sure straightened hair is in desired position before allowing to cool.

You can leave straightened hair to **AIR DRY** or use your blow-dryer's **COOL SHOT BUTTON** to cool hair down.
