

GOOD HAIR DAYS NEVER HAD IT SO GOOD™

Take care.

Human hair is often imitated but never duplicated. UNTIL NOW!

Our exclusive heat-friendly **EnvyHair™** blend looks, feels, moves and styles just like 100% human hair. And lasts even longer! Its built-in moisture-control withstands temperatures up to 285°F (120°C), making it easy to make **EnvyHair's** on-trend styles your own.

The key word: GENTLE!

- Store your wig on a wig stand or mannequin in a cool, dry location, safe from extreme temperatures.
- If you wear a wig regularly, try to have at least two to choose from, and rotate them to extend their wearable life.
- Only use care products that are specially formulated for your wig's fibers. **Never use hairspray formulated for human hair, as it can cause the fibers to deteriorate.**
- ENVY's wig care products include a set of four travel-sized liquids (**Wash-N-Wear Shampoo, Tangle Tamer Leave-In Conditioner, Shine On Lusterizer, and Freeze Frame Hair Spray**), **Hair Detox Anti-Bacterial Spray, Renu and Repair Glosser Spray, and Beauty Balm Sculpting Crème.**
- Shampoo your wig with **ENVY Wash-N-Wear Shampoo** (weekly, after 5–6 wears, or simply when it looks and feels like it needs shampooing). If you use synthetic wig care products, such as mousse, gel, spray, etc., you may need to shampoo and condition your wig more often.
- Be gentle when shampooing your wig; never twist or rub it. Use only cool or cold water, as hot water could damage the fibers. Pay special attention to the areas around the face where makeup and oil can accumulate.

1) SHAMPOO: Immerse your EnvyHair wig completely in a basin of cool water. Use an ample amount of **ENVY Wash-N-Wear Shampoo** and gently agitate into the fiber. Rinse shampoo thoroughly.

2) CONDITION: After shampooing, apply **ENVY Tangle Tamer Leave-In Conditioner** from the top to the ends of your EnvyHair wig. Then distribute conditioner using a wide tooth comb. Start combing down a few inches from the ends, then move up slightly and comb down again—working up the wig to the “roots” as you comb down. (Never comb directly from roots to ends.)

3) RINSE & DRY: After combing, thoroughly rinse your wig. Once the conditioner is rinsed out completely, dry by squeezing the hair gently. **Do not rub the wig vigorously or you will tangle the fiber.**

4) PROTECT: Spray **ENVY Shine On Lusterizer** to protect the fibers and maintain manageability. Comb Lusterizer through wig and allow to dry completely before combing, brushing, or styling as you normally would. You can use **Shine On Lusterizer** daily to extend the life of your EnvyHair wig.

We recommend weekly shampooing and conditioning for optimal results.
